

Seminar

Volker Neugebauer, M.D., Ph.D.

*Professor and Chair, Dept. of Pharmacology and Neuroscience
Giles C. McCrary Endowed Chair in Addiction Medicine
Director, Center of Excellence for Translational Neuroscience and Therapeutics
Texas Tech University Health Sciences Center, School of Medicine
Lubbock, TX*

"Corticolimbic pain mechanisms"

Synopsis - "Pain is characterized by its strong emotional-affective component. The amygdala is a brain center of emotions. Evidence will be provided that abnormally increased amygdala output drives pain behaviors and is caused by an imbalance of excitatory and inhibitory processing that results from impaired cortical control. Therapeutic implications will be discussed."

**March 23, 2017
12-1pm
SOD, Room 8105**

Hosted by: Dr. Richard Traub
